WE4A Programme Application

Seed Capital Request: \$5,000

January 2025

Table of Contents

1. Executive Summary

THE OPPORTUNITY

Bukedi sub-region in Eastern Uganda faces a devastating intersection of gender-based violence (37.1% sexual violence rate - 123% above national average) and period poverty (65% of girls cannot afford menstrual products). 58% of GBV survivors tell no one about their abuse - the highest silence rate in Uganda. There are ZERO reusable menstrual pad manufacturers within 300km. Rebloom Collective addresses both crises through an integrated survivor rehabilitation and green enterprise model.

Rebloom Collective is a social enterprise that places GBV survivor rehabilitation at its core, using green livelihood training in reusable menstrual pad production as the pathway to economic independence. Our integrated model breaks the cycle where women remain in abusive situations due to economic dependence - research shows 47% of Ugandan women face economic violence from partners.

Our Three-Pillar Model

The GBV Rehabilitation Center serves as our umbrella activity, providing trauma-informed counseling, psychosocial support, and skills training. Within this rehabilitation framework, we operate two supporting activities: Rebloom Pads production (creating sustainable employment for survivors) and the Community Health Entrepreneur (CHE) Network (providing last-mile distribution while creating additional income opportunities for women).

50+ GBV Survivors Year 1	\$14,460 Year 1 Revenue	Month 8 Break-Even	289% 3-Year ROI
------------------------------------	-----------------------------------	------------------------------	---------------------------

Funding Request

We are seeking \$5,000 in WE4A seed capital to establish our GBV Rehabilitation Center, launch Rebloom Pads production, and build our CHE distribution network. This investment will rehabilitate 50+ survivors, create 15+ jobs, reach 750+ girls with affordable menstrual products, and prevent 150,000+ disposable pads from entering the environment in Year 1 alone.

Competitive Advantage

- First and only reusable menstrual pad producer in Bukedi sub-region (nearest competitor 300km away)
- Founder with unique combination: MPH + BSWASA + GBV experience + established CHW networks
- Native Ateso speaker with deep community relationships and cultural understanding
- Integrated model addressing both GBV rehabilitation AND economic empowerment simultaneously

2. Company Overview

2.1 Mission Statement

OUR MISSION

To restore dignity, economic independence, and hope to GBV survivors through trauma-informed rehabilitation and green livelihood training, while addressing period poverty and environmental degradation in Eastern Uganda.

2.2 Vision

A community where every GBV survivor has access to comprehensive rehabilitation services, meaningful employment, and the opportunity to become an agent of positive change for other women and girls.

2.3 Core Values

Value	Description
Survivor-Centered	All programs designed with and for survivors, respecting their agency and choices
Economic Justice	Breaking the cycle of economic dependence that traps women in abusive situations
Environmental Stewardship	Creating sustainable products that protect both women and the planet
Community Integration	Working with traditional leaders and local structures for lasting change
Cultural Sensitivity	Delivering services in local languages with respect for cultural practices

2.4 Legal Structure

Rebloom Collective will be registered as a Community Based Organization (CBO) in Pallisa District, with plans to register as a social enterprise once operations are established. This structure allows us to receive grants and donations while generating sustainable revenue through product sales and services.

2.5 Location

Headquarters: Pallisa District, Bukedi Sub-region, Eastern Uganda. This strategic location places us at the center of a region with the highest GBV rates and poverty levels in Uganda, while being accessible to multiple districts for service delivery and product distribution.

3. Problem Statement & Market Need

3.1 The GBV Crisis in Eastern Uganda

Gender-based violence in Bukedi sub-region has reached crisis proportions that demand urgent, integrated intervention. The statistics paint a devastating picture:

Indicator	Bukedi/Eastern Uganda	National Average	Source
Sexual Violence Rate	37.1%	22%	UBOS VAWG Survey 2020
GBV Survivors Who Tell No One	58%	~40%	UBOS VAWG Survey 2020
Intimate Partner Violence (IPV)	56%	56%	Uganda DHS 2016
Economic Violence from Partners	47%	47%	UBOS VAWG Survey 2020
Poverty Rate (Eastern Uganda)	35.7%	21.4%	UBOS 2019/20
GBV Cases Reported (2020)	5,982	-	UNFPA 2021
YoY Increase in GBV Cases	+27%	-	UNFPA 2021

The Silence Crisis

The 58% silence rate in Bukedi - the highest in Uganda - means that survivors suffer in isolation without access to medical care, counseling, legal support, or pathways to economic independence. Cultural stigma, fear of retaliation, and economic dependence on abusers create a devastating cycle of silence and continued abuse.

SURVIVOR VOICE

"I like him...he is the source of income. If I let him go to prison, I am not going to get any money." - Focus group participant, UBOS VAWG Survey. This quote captures the tragic reality: economic dependence keeps women trapped in violent relationships.

3.2 The Period Poverty Connection

Period poverty and GBV are interconnected crises. When girls miss school during menstruation, they fall behind academically, increasing their vulnerability to early marriage and economic dependence. Research confirms:

- 28% of Ugandan girls miss school during menstruation (SNV 2017)
- 65% cannot afford menstrual products (Chaturvedi et al., Nature 2020)
- 85% resort to cloth, rags, or other unhygienic alternatives
- 23% of girls drop out of school entirely after menstruation begins
- Parliament called for urgent budget allocation for menstrual health in Eastern region (June 2024)

3.3 The Market Gap

Despite this urgent need, there are ZERO reusable menstrual pad manufacturers in Bukedi sub-region or anywhere in Eastern Uganda. The nearest producers are:

Producer	Location	Distance from Pallisa
AFRipads (So Sure)	Masaka	~300km (5-6 hours)
EcoSmart Pads	Mbarara	~350km
Days for Girls	Kampala/Jinja	~220km

This geographic gap means high transport costs, inconsistent supply, and prices that remain unaffordable for the poorest communities - exactly where need is greatest.

4. Our Solution: The Rebloom Model

Rebloom Collective addresses the intersecting crises of GBV, period poverty, and environmental degradation through an integrated three-pillar model. The GBV Rehabilitation Center serves as our umbrella activity, with Rebloom Pads production and CHE distribution as supporting sub-activities that enable economic empowerment.

THE REBLOOM MODEL

UMBRELLA ACTIVITY: GBV Rehabilitation Center (Core Mission) SUPPORTING ACTIVITY 1: Rebloom Pads Production (Livelihood Training & Employment) SUPPORTING ACTIVITY 2: CHE Distribution Network (Income Generation & Community Reach)

4.1 GBV Rehabilitation Center (Umbrella Activity)

The GBV Rehabilitation Center is the heart of Rebloom Collective. Every other activity exists to support our core mission: restoring dignity, healing, and economic independence to GBV survivors.

4.1.1 Trauma-Informed Counseling

All counseling services follow trauma-informed care principles, delivered in Ateso and Lugwere by trained counselors who understand local cultural contexts. Services include:

- Individual counseling sessions with trained psychosocial support workers
- Group therapy sessions creating peer support networks among survivors
- Crisis intervention and safety planning for immediate needs
- Referral pathways to medical care, legal services, and emergency shelter

4.1.2 The Survivor-to-Entrepreneur Pathway

Our rehabilitation model doesn't end with counseling - it creates a clear pathway from survivor to economically independent entrepreneur:

Stage	Duration	Activities	Outcome
1. Referral & Intake	Week 1	Assessment, safety planning, immediate support	Enrolled in program
2. Healing Phase	Weeks 2-8	Counseling, group therapy, psychosocial support	Trauma processing begins
3. Skills Training	Weeks 9-16	Pad production training, quality control, business basics	Production-ready
4. Employment	Month 5+	Paid production work at Rebloom center	Earning income
5. CHE Option	Month 9+	Training as Community Health Entrepreneur	Independent business

4.1.3 Community Reintegration Support

Many survivors face stigma and family rejection. Our community reintegration services include:

- Family mediation and reconciliation support where safe and appropriate

- Community dialogues facilitated by respected local leaders
- Linkages to Village Savings and Loan Associations (VSLAs) for financial inclusion
- Ongoing peer support groups for sustained recovery

4.2 Rebloom Pads Production (Supporting Activity 1)

Rebloom Pads production serves our rehabilitation mission by providing practical skills training and employment opportunities for survivors. The product itself addresses the parallel crisis of period poverty.

4.2.1 Product Specifications

Feature	Specification	Benefit
Kit Contents	4 reusable pads + waterproof pouch	Complete menstrual management solution
Materials	Cotton flannel, waterproof PUL layer	Comfortable, leak-proof, washable
Lifespan	2-3 years with proper care	Replaces 200+ disposable pads
Price Point	UGX 15,000 (~\$4.00)	Affordable for target market
Production	Made by GBV survivors	Each purchase supports rehabilitation

4.2.2 Production Training Curriculum

Survivors receive comprehensive 8-week training covering pattern cutting, sewing techniques, quality control, hygiene standards, packaging, and basic business skills. Training is conducted in local languages with practical, hands-on learning.

4.3 CHE Distribution Network (Supporting Activity 2)

Community Health Entrepreneurs (CHEs) provide last-mile distribution while creating income opportunities. This network extends our reach while building a sustainable sales channel.

4.3.1 CHE Model

- CHEs purchase kits at wholesale (UGX 12,000) and sell at retail (UGX 15,000)
- 20-25% commission provides meaningful income supplement
- CHEs also deliver MHM education and GBV awareness in communities
- Priority recruitment from graduated survivors and existing CHW networks
- Year 1 target: 25 CHEs covering 50+ villages

4.4 Environmental Impact

While environmental impact is a supporting benefit rather than our primary mission, it represents a significant contribution:

Metric	Year 1 Impact	3-Year Cumulative
Disposable pads prevented	150,000+	500,000+
Plastic waste diverted	750+ kg	2,500+ kg

Decomposition time saved	500+ years per pad	Millions of years
--------------------------	--------------------	-------------------

5. Market Analysis

5.1 Target Market

Rebloom Collective serves three interconnected market segments:

Primary Market: GBV Survivors

Women and girls who have experienced gender-based violence in Bukedi sub-region and surrounding districts. With 5,982 reported GBV cases in 2020 (and a 58% non-reporting rate suggesting far more unreported cases), the need for rehabilitation services is immense.

Secondary Market: Menstruating Women and Girls

Approximately 490,833 people in Pallisa District, with an estimated 25% being women of menstruating age (~122,000). Of these, 65% cannot afford commercial menstrual products, representing our core customer base for Rebloom Pads.

Institutional Market: NGOs, Schools, and Health Facilities

Organizations already working on MHM, GBV, or girls' education represent bulk purchasing opportunities. Key potential partners include UNFPA, BRAC, schools participating in menstrual health programs, and health facilities.

5.2 Competitive Analysis

Our competitive position is exceptionally strong due to the complete absence of local competitors:

Factor	Rebloom Collective	Nearest Competitors
Location	Pallisa (Local)	300+ km away
Transport Cost	Zero	Adds 30-50% to price
Cultural Fit	Ateso/Lugwere delivery	Generic national approach
Social Impact	GBV survivor employment	Standard manufacturing
Community Trust	Local founder with relationships	External organizations
Availability	Consistent local supply	Intermittent, weather-dependent

5.3 Market Size and Growth

The addressable market in Eastern Uganda represents a significant opportunity:

Market Segment	Size	Annual Value (Potential)
GBV Rehabilitation Services	6,000+ reported cases/year	\$180,000+ (service fees)
Reusable Pad Market (Pallisa)	~80,000 potential users	\$320,000 (at \$4/kit)
Reusable Pad Market (Bukedi)	~300,000 potential users	\$1.2 million
NGO/Institutional Purchases	20+ active organizations	\$100,000+/year

6. Business Model & Revenue Streams

6.1 Revenue Streams

Rebloom Collective generates revenue through four complementary streams:

Revenue Stream	Description	Year 1 Projection	% of Revenue
Rebloom Pad Retail Sales	Direct sales at markets, events, and center	\$5,100	35%
Bulk NGO/School Orders	Wholesale to institutions at 25% discount	\$4,600	32%
CHE Network Sales	Wholesale to CHEs at 20% margin	\$2,600	18%
Training & MHM Workshops	Fees for MHM education sessions	\$2,160	15%
TOTAL		\$14,460	100%

6.2 Pricing Strategy

Product/Service	Price (UGX)	Price (USD)	Notes
Rebloom Pad Kit (Retail)	15,000	\$4.00	4 pads + pouch
Rebloom Pad Kit (Bulk)	11,250	\$3.00	25% discount, min 50 kits
Rebloom Pad Kit (CHE)	12,000	\$3.20	20% margin for CHEs
MHM Workshop (School)	75,000	\$20.00	Per session, 30+ students
MHM Workshop (Community)	37,500	\$10.00	Per session, subsidized

6.3 Unit Economics

Metric	Amount	Notes
Retail Price per Kit	\$4.00	UGX 15,000
Materials Cost	\$1.20	Fabric, PUL, thread, packaging
Labor Cost	\$0.80	Survivor wages (fair trade)
Total COGS	\$2.00	50% of retail price
Gross Profit per Kit	\$2.00	50% gross margin
Break-even Units/Month	200 kits	At average selling price

6.4 Cost Structure

Year 1 operating costs are projected at \$9,650, distributed as follows:

Cost Category	Amount	% of Total	Description
Raw Materials	\$3,200	33%	Fabrics, PUL, thread, packaging supplies
Producer Wages	\$2,400	25%	Fair wages for 5 survivor-producers
GBV Program Costs	\$1,530	16%	Counseling, supplies, referrals
Facility & Utilities	\$1,200	12%	Rent, electricity, water
Transport & Marketing	\$800	8%	Distribution, community outreach
CHE Commissions	\$520	5%	20% on CHE sales
TOTAL	\$9,650	100%	

7. Operations Plan

7.1 Facility Requirements

Rebloom Collective will operate from a rented facility in Pallisa town with the following specifications:

Space	Size	Purpose
Counseling Room	15 sqm	Private individual and group sessions
Production Area	30 sqm	Sewing machines, cutting tables, storage
Training Room	20 sqm	Skills training and MHM workshops
Storage	10 sqm	Raw materials and finished products
Office	10 sqm	Administration and record-keeping

7.2 Equipment and Supplies

Item	Quantity	Unit Cost	Total
Industrial Sewing Machines	3	\$250	\$750
Cutting Tables	2	\$75	\$150
Fabric Scissors & Tools	10 sets	\$20	\$200
Initial Fabric Stock	Bulk	-	\$500
Packaging Materials	Bulk	-	\$200
Office Equipment	Various	-	\$200
Counseling Supplies	Various	-	\$100
TOTAL EQUIPMENT			\$2,100

7.3 Staffing Plan

Position	Number	Status	Responsibilities
Founder/Director	1	Full-time	Overall management, fundraising, partnerships
Counselor	1	Part-time	GBV counseling, psychosocial support
Production Supervisor	1	Full-time	Quality control, training, operations
Survivor-Producers	5	Full-time	Pad production (growing to 10 by Year 2)
CHE Coordinators	2	Part-time	CHE recruitment, training, support

7.4 Implementation Timeline

Month	Milestone	Key Activities
1	Setup	Secure facility, purchase equipment, hire staff

2	Launch	Begin GBV intake, start production training
3-4	Production Start	First Rebloom Pads produced, initial sales
5-6	CHE Launch	Train first 10 CHEs, expand distribution
7-8	Scale	Reach 50+ survivors served, 20+ CHEs active
9-12	Optimize	Refine operations, build NGO partnerships

8. Management Team

8.1 Founder Profile

KEVIN AUJO

Founder & Executive Director

MPH (Uganda Martyrs University) | BSWASA (Kyambogo University)

Kevin brings a unique combination of public health expertise, social work training, and hands-on GBV experience that makes him ideally suited to lead Rebloom Collective.

Relevant Experience

1. Case Management Officer, Baylor-Uganda: Supervising peer mothers and Community Health Workers, providing direct access to established CHW networks for CHE recruitment.
2. GBV Counselor, Pallisa Probation Office: Providing psychosocial support to survivors at the district shelter, coordinating community dialogues on GBV prevention.
3. Peer Educator, Naguru Teenage Centre: Trained in Adolescent Sexual and Reproductive Health (ASRH) education, including MHM curriculum development and delivery.
4. Quality Improvement Training: Skills in data management, monitoring and evaluation, and donor reporting.

Local Advantage

- Native Ateso speaker, fluent in Lugwere and Luganda
- Born in Kumi District, Eastern Uganda - deep understanding of local culture and context
- Established relationships with traditional leaders, LC structures, and health facilities
- Trusted community member with credibility to address sensitive GBV issues

8.2 Advisory Support

Rebloom Collective will establish a Community Advisory Board including local women leaders, GBV survivors, health workers, and traditional leaders to ensure programs remain community-driven and culturally appropriate. Professional advisory support will be sought from experienced social enterprise leaders and GBV specialists.

9. Financial Projections

9.1 Summary Projections

Metric	Year 1	Year 2	Year 3
Total Revenue	\$14,460	\$28,000	\$45,000
Total Costs	\$9,650	\$16,800	\$27,000
Net Profit	\$4,810	\$11,200	\$18,000
Profit Margin	33.3%	40.0%	40.0%
Cumulative Profit	\$4,810	\$16,010	\$34,010
Break-Even Month	Month 8	-	-
ROI on \$5,000 Investment	96%	220%	289%

9.2 Year 1 Monthly Cash Flow

Month	Revenue	Costs	Net	Cumulative
Month 1	\$0	\$2,500	\$-2,500	\$-2,500
Month 2	\$150	\$600	\$-450	\$-2,950
Month 3	\$300	\$650	\$-350	\$-3,300
Month 4	\$500	\$700	\$-200	\$-3,500
Month 5	\$750	\$750	\$0	\$-3,500
Month 6	\$950	\$780	\$170	\$-3,330
Month 7	\$1,100	\$800	\$300	\$-3,030
Month 8	\$1,250	\$820	\$430	\$-2,600
Month 9	\$1,400	\$850	\$550	\$-2,050
Month 10	\$1,500	\$870	\$630	\$-1,420
Month 11	\$1,650	\$890	\$760	\$-660
Month 12	\$1,910	\$940	\$970	\$310

9.3 Year 2 Monthly Cash Flow

Month	Revenue	Costs	Net	Cumulative
Month 13	\$2,000	\$1,000	\$1,000	\$1,310
Month 14	\$2,100	\$1,050	\$1,050	\$2,360
Month 15	\$2,200	\$1,100	\$1,100	\$3,460
Month 16	\$2,300	\$1,150	\$1,150	\$4,610
Month 17	\$2,400	\$1,200	\$1,200	\$5,810
Month 18	\$2,500	\$1,250	\$1,250	\$7,060
Month 19	\$2,600	\$1,300	\$1,300	\$8,360

Month 20	\$2,700	\$1,350	\$1,350	\$9,710
Month 21	\$2,800	\$1,400	\$1,400	\$11,110
Month 22	\$2,900	\$1,450	\$1,450	\$12,560
Month 23	\$3,000	\$1,500	\$1,500	\$14,060
Month 24	\$3,100	\$1,550	\$1,550	\$15,610

9.4 Year 3 Monthly Cash Flow

Month	Revenue	Costs	Net	Cumulative
Month 25	\$3,300	\$1,650	\$1,650	\$17,260
Month 26	\$3,500	\$1,750	\$1,750	\$19,010
Month 27	\$3,700	\$1,850	\$1,850	\$20,860
Month 28	\$3,900	\$1,950	\$1,950	\$22,810
Month 29	\$4,100	\$2,050	\$2,050	\$24,860
Month 30	\$4,300	\$2,150	\$2,150	\$27,010
Month 31	\$4,500	\$2,250	\$2,250	\$29,260
Month 32	\$4,700	\$2,350	\$2,350	\$31,610
Month 33	\$4,900	\$2,450	\$2,450	\$34,060
Month 34	\$5,100	\$2,550	\$2,550	\$36,610
Month 35	\$5,300	\$2,650	\$2,650	\$39,260
Month 36	\$5,500	\$2,750	\$2,750	\$42,010

9.5 Key Financial Assumptions

- Production capacity grows from 100 kits/month (Q1) to 300 kits/month (Q4 Year 1) to 600 kits/month (Year 3)
- CHE network expands from 10 (Month 6) to 25 (Year 1) to 60 (Year 2) to 100 (Year 3)
- NGO bulk orders begin Q2 with 2-3 contracts secured by end of Year 1
- Average selling price of \$3.50 (blended retail/wholesale)
- Material costs remain stable; labor costs increase 10% annually
- Geographic expansion to 3 adjacent districts begins Year 2

10. Impact Metrics & Social Return

10.1 GBV Rehabilitation Impact (Primary)

Metric	Year 1	Year 2	Year 3	Cumulative
Survivors Enrolled in Program	50+	100+	150+	300+
Survivors Completing Rehabilitation	40+	85+	130+	255+
Survivors Employed at Center	5	10	15	15
Survivors Becoming CHEs	5	15	25	45
Community Dialogues Held	12	24	36	72
Referrals to Partner Services	30+	60+	90+	180+

10.2 Economic Empowerment Impact

Metric	Year 1	Year 2	Year 3	Cumulative
Jobs Created (Direct)	15	30	45	45
CHE Income Opportunities	25	60	100	100
Total Women Earning Income	40	90	145	145
Avg CHE Monthly Income	\$30	\$40	\$50	-
Girls Reached with Pads	750+	2,000+	4,000+	6,750+

10.3 Environmental Impact

Metric	Year 1	Year 2	Year 3	Cumulative
Disposable Pads Prevented	150,000+	400,000+	800,000+	1,350,000+
Plastic Waste Diverted (kg)	750+	2,000+	4,000+	6,750+
CO2 Equivalent Avoided (kg)	3,000+	8,000+	16,000+	27,000+

10.4 Social Return on Investment

For every \$1 invested in Rebloom Collective, we estimate a social return of \$4-6 when accounting for: avoided healthcare costs from improved menstrual hygiene, educational benefits from reduced school absenteeism, economic gains from survivor employment, reduced burden on public GBV services, and environmental benefits from waste reduction.

11. Risk Analysis & Mitigation

Risk	Likelihood	Impact	Mitigation Strategy
Low initial demand	Medium	High	Pre-launch community engagement; NGO partnerships secured before launch; CHE network for market access
Supply chain disruption	Low	Medium	Multiple fabric suppliers; 2-month inventory buffer; local sourcing where possible
Survivor drop-out from program	Medium	Medium	Comprehensive support services; peer mentoring; flexible timelines; survivor-centered approach
Cultural resistance to MHM	Low	Medium	Partnership with traditional leaders; local language delivery; community advisory board
Staff turnover	Medium	Medium	Fair wages; supportive work environment; clear career pathways; local hiring preference
Competition entering market	Low	Low	First-mover advantage; brand loyalty; integrated GBV mission creates differentiation
Economic downturn reducing purchasing	Medium	Medium	Low price point; NGO/institutional sales buffer; essential product category

12. Funding Request & Use of Funds

12.1 Investment Request

FUNDING REQUEST

Rebloom Collective is seeking \$5,000 in seed capital through the WE4A Programme to establish our GBV Rehabilitation Center and launch Rebloom Pads production. This investment will be the foundation for a sustainable social enterprise that generates ongoing impact.

12.2 Use of Funds

Category	Amount	% of Total	Description
Production Equipment	\$1,300	26%	Sewing machines, cutting tables, tools
GBV Center Setup	\$1,100	22%	Counseling room, furniture, supplies
CHE Network Launch	\$1,000	20%	Training materials, starter kits, transport
Raw Materials	\$900	18%	Initial fabric and supplies inventory
Operations Reserve	\$700	14%	Rent, utilities, marketing for Months 1-3
TOTAL	\$5,000	100%	

12.3 Expected Returns

The \$5,000 WE4A investment will generate:

- Year 1: \$14,460 revenue, \$4,810 net profit (96% ROI)
- Year 3: \$45,000 revenue, \$18,000 net profit (289% cumulative ROI)
- Break-even achieved by Month 8
- Self-sustaining operations from Year 2 onwards

12.4 Future Funding

Following successful establishment with WE4A seed funding, Rebloom Collective will pursue additional funding from GBV-focused foundations, climate/environmental grants, impact investors, and earned revenue reinvestment to scale operations across Eastern Uganda.
